**Trench Limited, a Division of Siemens, Announces The Awarding of a Key Manufacturing Contract to Daleena Technologies Inc.**

Trench Limited announced today the awarding of a key Manufacturing Contract to Daleena Technologies Inc. to build and test its PLC, through hole, product line of printed circuit boards.

“Daleena demonstrated that they had the manufacturing expertise, a committed Management team and the dedication to quality and customer service that we were searching for,” said Keith Balcombe, Materials Manager for the Trench Coil and PLC Product line. “As a start-up company, Daleena was initially viewed as a gamble; however, as the discussions continued, our reassurance in their commitment to our partnership grew. The contract awarded to Daleena supports a significant portion of our PLC business at Trench. We look forward to many years of continued service from Daleena.”
